Meeting Jetpack Now Included	3
Improved Backstage Experience	3
RESOLVED ISSUES IN VERSION 16.0.152	4
General Usability	4
Task Management	4
KNOWN ISSUES IN VERSION 16.0.152	5

WHAT'S NEW IN VERSION 2016

New Diagramming Capabilities - Flowchart, Concept Maps & More

- Create network and IT systems diagrams, engineering workflows, business process flowcharts, and other step-by-step illustrations, using new templates and diagram tools.
- Includes new, commonly-used flow chart topic shapes.
- Drag-and-drop topic shapes, decision topics, and line annotations makes creating flowcharts and other diagrams simple.
- Add notes, attachments, icons, tags, and other content to provide context. You can also filter, index, and search—so you can always find what you need.

New Multi-Monitor Support

- MindManager 2016 for Windows offers multi-monitor support, allowing you to work with MindManager maps on two (or more) monitors.

New Share Options on The Home Tab

- Easy access to the most popular Send and Export formats.

New Microsoft Office 2016-style Ribbon

- The Ribbon interface has been updated to match the look and feel of Microsoft Office 2016, including updated White, Colorful, and Dark Gray Themes.

New Custom Tag Colors

- Assign custom tag colors to any tags in the Map.
- Quickly differentiate tags at a glance.

New Subtopic Counter

- MindManager now displays the total number of subtopics in collapsed topic branches.

Redesigned Icons Markers

- Progress and Priority icons are now bolder and brighter in all maps.
- Completed Task Markers are now displayed in green.
- All default Map Index markers have been redesigned with improved anti-aliasing.

Improved Topic Information Visual Design

- Customize the tag and task info background and font colors to match the look and feel of any map.
- Improved user interface displays topic information icons.

Meeting Jetpack Now Included

- Meeting Jetpack Templates, Map Parts, and Images are now a standard feature of MindManager.

Improved Backstage Experience

- Similar functionality has been grouped for improved discoverability.
- File > Open now also contains Recent Maps.
- File > Share now contains both Export and Save & Send functions.
- Improved Save As experience lets you easily choose desired file type.

RESOLVED ISSUES IN VERSION 16.0.152

General Usability

Issue: Analytic View add-in does not work with MindManager 64-bit.

Resolution: Resolved.

Issue: Numeric topic properties are incorrectly aligned left.

Resolution: Numeric topic properties are correctly aligned right.

Issue: Removing task info does not remove Effort tag.

Resolution: Effort tag is removed when task info is removed.

Issue: Gantt Chart columns have to be resized each time the Gantt View is opened.

Resolution: Gantt Chart columns no longer have to be resized.

Issue: Copying text and spaces from Topic Notes to other applications is pasted with incorrect formatting.

Resolution: Formatting is preserved.

Issue: Windows Search does not work with 32-bit MindManager on 64-bit Operating Systems.

Resolution: Windows Search works with 32-bit MindManager on 64-bit Operating Systems.

Issue: MindManager stops working if formatting is applied in the Theme Editor without first selecting a style group.

Resolution: Resolved.

Issue: Outlook Add-in does not work with IMAP accounts with Outlook 2013 and 2016.

Resolution: IMAP support has been improved.

Issue: High memory utilization present when editing a Map that contains a large number of topics with formulas.

Resolution: Better memory handling has been implemented.

Task Management

Issue: Mindjet Tasks icon is not removed if Task information is disconnected from Mindjet Tasks.

Resolution: Mindjet Tasks icon is properly removed.

KNOWN ISSUES IN VERSION 16.0.152

Issue: Flowchart shapes and Relationship labels do not export properly to Mindjet Viewer Format.

Workaround: Use an alternative export, such as Save as Image to share your content.

Issue: Detached map loses focus after completing an export.

Workaround: Refocus on the detached map after export completes.

Issue: Detached map loses focus when hovering over “Close” button in Notes pane.

Workaround: Close Notes pane by using keyboard shortcut **Control + T**.

Issue: The Database Linker cannot connect to the Sample Database in the 64-bit version of MindManager.

Workaround: N/A.

Issue: Message that Java is not installed appears when exporting a map to the Mindjet Viewer and a 64-bit version of Java is installed.

Workaround: Install the 32-bit version of Java.

Issue: Formula does not recalculate while co-editing with earlier versions, or the web version.

Workaround: The formula recalculates when the user of Version 14 updates the map (e.g. adding a topic, changing a property value).

Issue: Crash occurs when trying to connect to Outlook when Outlook is installed but not configured.

Workaround: Setup and launch Outlook before attempting to use the Outlook integration.

Issue: Proxy settings may cache while the desktop app is opened. If new, incorrect credentials are added, the app will use the earlier, validated credentials.

Workaround: Close the desktop app to remove the cached credentials and prevent unauthorized access.

Issue: Connection drops and errors occur when a large amount of topics (e.g. 200+ topics) are sent to Mindjet Tasks.

Workaround: Send the topics in smaller groups.
